

1 Introduction

This Quickstart is intended for administrators and describes the setup and configuration of Swyx VisualContacts Server for SwyxON.

For more information, see the [SwyxON documentation](#).

2 Installation

- The installation is done via SwyxON Portal under **UC Tenant | [select UC Tenant] | Licenses | Solution AddOns**.
- For more information see [SwyxON Documentation – Solution AddOn](#).

3 Administration login

Prerequisites:

- You have installed and validly licensed the Solution AddOn for your UC Tenant.
 - You have installed Remote Admin Connector and are connected to your SwyxON Tenant.
 - If you are not connected to the customer network, for the Remote Admin Login on VisualContacts Server you need the Meta Admin login credentials, that you have defined via SwyxON. The **Default login** is: User 'admin', password 'admin' (for versions prior to 6. the default password is 'estos').
1. Download **Remote Administration for Swyx VisualContacts Server** via enreach.de/en/products/support/support-downloads.html.
 2. Execute the file and follow the instructions of the installation wizard to install the program.

The default installation path is: C:\Program Files\estos\MetaDirectory.

3. Open **MetaAdmin.exe**.
 - ✓ The Swyx VisualContacts Administration opens.
4. Enter the following data:
 - If you are connecting via Remote Connector, enter the following IP: **Server:** 127.0.0.1 and **Admin Port:** 7302. Otherwise, enter the IP address of the UC Tenant. These can be found in SwyxON under **UC Tenant | [Select UC Tenant] | General Settings | UC Administration**.

- **Force TLS encrypted connection:** Leave deactivated
- **User:** Your MetaAdmin user, see **Prerequisites**, page 1.
- **Password:** Your MetaAdmin password, see **Prerequisites**, page 1.

5. Confirm your entry with **OK**.

✓ You are connected.

4 Configuration

SwyxON specific information is described below, for detailed documentation see help.estos.com/help/en-US/meta/.

- **General | License settings:** A SwyxWare user with administrative permissions is required here (here UPN). This is not the login from **Administration login**, page 1.

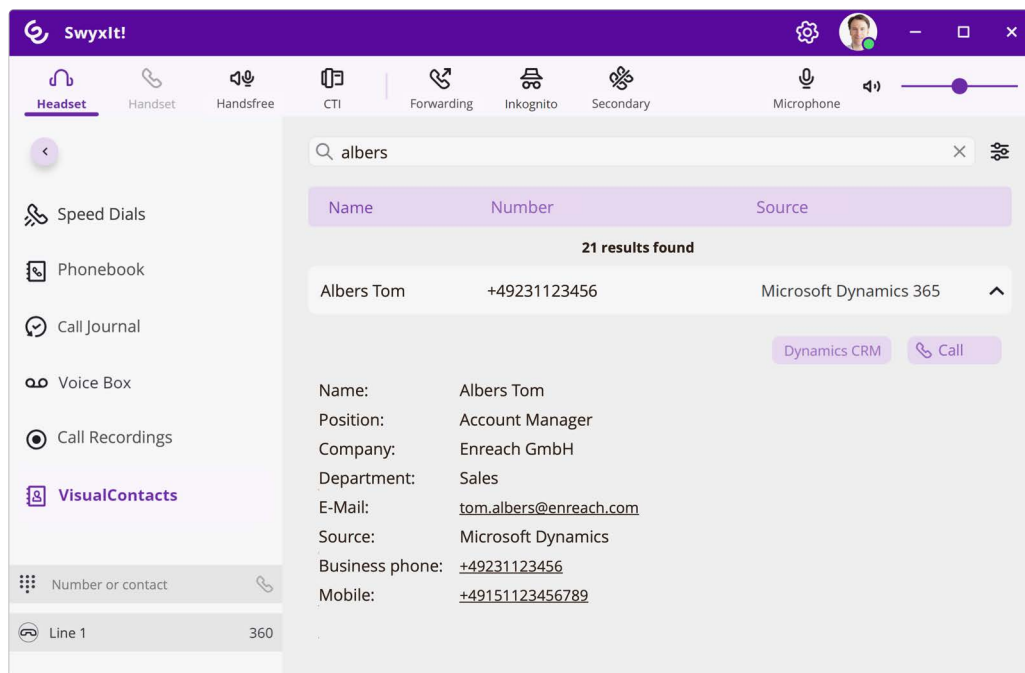

If you delete the corresponding SwyxWare user, the application can no longer be accessed.

- **Phonebook import:** The import of .csv files for local phone books is currently not supported. The following services are currently supported:
 - Microsoft Dynamics 365
 - Microsoft Graph
 - Microsoft EWS
 - Microsoft Dynamics NAV
 - Sales force
 - Google

5 VisualContacts in SwyxIt!

VisualContacts is only displayed in SwyxIt! if you have selected the AddOn during installation. For more information see the [SwyxIt! Documentation](#). A valid user license is required to use the AddOn.

1. In SwyxIt! select  **VisualContacts**.
✓ The VisualContacts AddOn is displayed.

6 VisualContacts Skin in SwyxIt! Classic

Here you will find a short guide on how to select the VisualContacts skin in SwyxIt! Classic and an example screenshot of the skin. For more information see the [SwyxIt! Classic Documentation - Loading Skin](#).

The **Load skin** and **Edit skin** functions must be unlocked by your administrator. Please also note the requirements described at **VisualContacts in SwyxIt!**, page 2.

1. In SwyxIt select **File | Skin | Load...**
2. Select the desired skin from the dropdown list and confirm with **OK**.
✓ The change will take effect immediately, the **VisualContacts** tab appears.
